

Sustainment (Depot/MRO)

Team Lead

Tom Lastoskie

Team Members

- Scott Pearl – AFRL
- Steve Watts – Army
- P.K. Guha – USMC
- Laylah Poore - Raytheon
- Therese Honda – Raytheon
- John Rizzo – P&W
- Greg Stottlemeyer – APT
- Michael Ganowsky - Boeing

Feedback on New Chapter

- Team assessment of New Chapter
 - Value added: Yes - helps with general dialog of how MRL criteria apply to the industrial base
- Sustainment Section 8.3
 - Value added: Yes
 - Acceptable as is: Yes
 - Good start but needs more definitization
 - General Comments/ Observations
 - Change section 8.3 name to “MRO/Maintenance & Serviceability”
 - ‘Depots’ are an integral part of the industrial base
 - DMSMS contractual arrangements is always a challenge
 - Make sure that people understand that amount of data available is a ‘state condition’ not the sole reason for entrance into MRL ‘level’
 - Need ‘top down’ support & Depot SME involvement
- Recommended Actions
 - Continue working Section 8.3

Feedback on Proposed Matrix Change

STE/SIE Validation

- Team Assessment of proposed changes
 - Value added: Yes
 - Acceptable as is: No
 - Change MRL 7 to add 'initial' validation plans are complete
 - Change MRL 8 remove 'approved' and add at end of statement, 'if applicable'
 - General Comments/ Observations
 - Recommended Actions

Other Recommended Changes

- Matrix
- Deskbook
 - Better explanation of what 'tailoring' means (i.e., applicable/not applicable and 'meet the intent' of the criteria)
 - We need to do a better job with explaining how prime/supplier operations relate to 'all criteria' as a starting point
- MRL Users Guide
 - Use 'User Guide' for clarification of terminology for all communities

Summary

- Workshop value
 - Changes needed
- Team assessment of New Chapter
- Team assessment of proposed Matrix Change
- Other Recommended Changes
 - Matrix
 - Deskbook
 - MRL Users Guide
- Other comments
